

FUNCTIONAL NANOMATERIALS 4th Edition

Dear participants,

The 4th edition of the workshop “Functional Nanomaterials” is taking place in the period 01- 02 July 2009 at the headquarter of the National Research and Development Institute for Non-ferrous and Rare Metals, in Pantelimon, satellite town of Bucharest, capital of Romania.

The workshop intends to debate the progress in the field of functional nanomaterials with emphasis on: chemical - physical processes related to their synthesis and processing, development of theoretical models and computer added control methods for prediction of mechanical and thermal properties, interphase interactions in composite and functional graded materials, methods for chemical characterisation, with emphasis on non-destructive methods

Aspects related to the possibility for technology transfer toward SMEs will be also discussed.

The abstracts and review papers will be published and distributed to participants in a special volume edited by AVANMAT.

Arrangements will be discussed for publication in the Journal of Optoelectronics and Advanced Materials, included in the Science Citation Index Expanded (Scisearch).

Social Programme,

Participants from abroad intending to spend the weekend in Bucharest or the Carpathian mountains, at their request, may be helped with necessary arrangements for hotel reservation and transport information.

This request may be submitted together with the registration form.
